Plantation Shutters, Roller Blinds, Curtains, Venetians, Sheerview, Roman Blinds, Soft Furnishings, Roller Screens – Which is the best window treatment product for your application?

This question can be answered very simply when you arrange a FREE Design Consultation with a Victory Décor Consultant. They will discuss your needs and qualify which window covering product is ideal for your home. You may like the look of a particular blind but may be unaware of the large range offered by Victory! There may be another window covering solution that better suits your needs. This is when the Victory Décor Consultant steps in to make the entire window covering selection process simple and effortless. Why shop around and attain unnecessary quotes when a Victory Décor Consultant will provide you with the highest level of service, product knowledge and a competitive price?

There has been a move away from slatted window coverings e.g. venetians in kitchens to more practical window coverings such as the Roller Blind. In the kitchen the following factors need to be considered - durability, ease of cleaning, products that permit enough natural light, have the ability to be cleared away and don't contain odours. Holland Roller Blinds provide all of the above, they are simple to clean, can be drawn up conveniently and are adjustable thanks to an easily controlled heavy-duty chain or automated system.

### **Opaque Blinds**

Work better for bedrooms due to the light entering the room and the ability to control the amount of light.

### **Awnings for the Exterior**

Will reduce energy requirements dramatically and keep you cool over summer and warmer over winter.

### **Most Popular Colours for Blinds**

In most blinds the plethora of colours is vast, just like the most popular car colours and shirt colours in the world, are variations of white.

### **Decisions that People Need to Make When Choosing a Blind**

A blind is not a blind! There are many different qualities available in blinds, most consumers would not know this and believe that all blinds are the same. The difference in materials and components used will have a great affect on function and longevity. Just like a cheap suit, it will look good the first time worn but after a good dry clean or a couple of uses they tend to look very ordinary, and in the case of blinds if the blind is not functioning to its optimum capabilities what's the use of having a blind. The blind must do its job; your Victory Décor Consultant will ensure that your requirements are met.

Once, your blinds, curtains or awnings are installed a Victory Technician will install your window coverings wearing slippers, gloves and vacuum they will leave your house as clean as when they arrived!
